NEHRP GUIDELINES FOR THE SEISMIC REHABILITATION OF BUILDINGS

Issued by FEMA in furtherance of the Decade for Natural Disaster Reduction
The Building Seismic Safety Council (BSSC) was established in 1979 under the auspices of the National Institute of Building Sciences as an entirely new type of instrument for dealing with the complex regulatory, technical, social, and economic issues involved in developing and promulgating building earthquake risk mitigation regulatory provisions that are national in scope. By bringing together in the BSSC all of the needed expertise and all relevant public and private interests, it was believed that issues related to the seismic safety of the built environment could be resolved and jurisdictional problems overcome through authoritative guidance and assistance backed by a broad consensus.

The BSSC is an independent, voluntary membership body representing a wide variety of building community interests. Its fundamental purpose is to enhance public safety by providing a national forum that fosters improved seismic safety provisions for use by the building community in the planning, design, construction, regulation, and utilization of buildings.

To fulfill its purpose, the BSSC: (1) promotes the development of seismic safety provisions suitable for use throughout the United States; (2) recommends, encourages, and promotes the adoption of appropriate seismic safety provisions in voluntary standards and model codes; (3) assesses progress in the implementation of such provisions by federal, state, and local regulatory and construction agencies; (4) identifies opportunities for improving seismic safety regulations and practices and encourages public and private organizations to effect such improvements; (5) promotes the development of training and educational courses and materials for use by design professionals, builders, building regulatory officials, elected officials, industry representatives, other members of the building community, and the general public; (6) advises government bodies on their programs of research, development, and implementation; and (7) periodically reviews and evaluates research findings, practices, and experience and makes recommendations for incorporation into seismic design practices.

**BOARD OF DIRECTION: 1997**

**Chairman**  
Eugene Zeller, City of Long Beach, California

**Vice Chairman**  
William W. Stewart, Stewart-Scholberg Architects, Clayton, Missouri (representing the American Institute of Architects)

**Secretary**  
Mark B. Hogan, National Concrete Masonry Association, Herndon, Virginia

**Ex-Officio**  
James E. Beavers, Beavers and Associates, Oak Ridge, Tennessee

**Members**  
Eugene Cole, Carmichael, California (representing the Structural Engineers Association of California); S. K. Ghosh, Portland Cement Association, Skokie, Illinois; Nestor Iwankiw, American Institute of Steel Construction, Chicago, Illinois; Gerald H. Jones, Kansas City, Missouri (representing the National Institute of Building Sciences); Joseph Nicoletti, URS/John A. Blume and Associates, San Francisco, California (representing the Earthquake Engineering Research Institute); John R. “Jack” Prosek, Turner Construction Company, San Francisco, California (representing the Associated General Contractors of America); W. Lee Shoemaker, Metal Building Manufacturers Association, Cleveland, Ohio; John C. Theiss, Theiss Engineers, Inc., St. Louis, Missouri (representing the American Society of Civil Engineers); Charles Thornton, Thornton-Tomasetti Engineers, New York, New York (representing the Applied Technology Council); David P. Tyrre, American Forest and Paper Association, Colorado Springs, Colorado; David Wismer, Department of Licenses and Inspections, Philadelphia, Pennsylvania (representing the Building Officials and Code Administrators International); Richard Wright, National Institute of Standards and Technology, Gaithersburg, Maryland (representing the Interagency Committee for Seismic Safety in Construction)

**BSSC Staff**  
James R. Smith, Executive Director; Thomas Hollenbach, Deputy Executive Director; Larry Anderson, Director, Special Projects; Claret M. Heider, Technical Writer-Editor; Mary Marshall, Administrative Assistant
NEHRP GUIDELINES FOR THE SEISMIC REHABILITATION OF BUILDINGS (FEMA Publication 273)

Prepared for the
BUILDING SEISMIC SAFETY COUNCIL
Washington, D.C.

By the
APPLIED TECHNOLOGY COUNCIL (ATC-33 Project)
Redwood City, California

With funding by
FEDERAL EMERGENCY MANAGEMENT AGENCY
Washington, D.C.

October 1997
Washington, D.C.
In Memoriam
